

Structuring Sessions

Rachel Andrews and Tim Cox

Housekeeping

- Combination of on-screen presentation and commentary
- Introduction to controls
- Questions and help
- Webinar recording

Introduction

Looking at:

- T.A.S.K
- E.D.I.C.T.S
- S.E.A
- P.A.M.E

T.A.S.K.

- a model for instructor trainers/coaches for briefing instructor candidates
- instructors consider TASK questions before launching into a session
- promotes a safe, unhurried and structured session.

TIME

How long do you think it will take to deliver?

AREA

Where are you going to run the session?

SAFETY

Are there and safety considerations?

**THINK
SAFETY**
it couldn't hurt

KEY TEACHING POINTS

What are the key teaching points from the syllabus?

T.A.S.K

- Time
- Area
- Safety
- Key Teaching Points

E.D.I.C.T.S

a coaching model that caters for all learning styles where a practical skill is being taught

a structure for instructors to use when delivering sessions

EXPLANATION

- A brief introduction to the skill
- Use visual aids, diagrams
- When we use it
- Key points

DEMONSTRATION

- Instructor gives a visible, polished display of their explanation,
- Keep it close to the students so they can all see.
- Keep it timely,
- Highlight the key points

IMITATION

- Get the student to have a go
- Let mistakes happen if it is safe
- Only interrupt if safety is compromised

CORRECTION

- Feed back to the student
- Encourage the student to interact and problem solve
- Use the key points
- Should give the opportunity for another go

TRAINING

- Let the students try again
- Have they taken feedback onboard?

SUMMARY

- Give a verdict on how it went
 - Discuss the key points/changes that made it successful
 - What are their take aways?
 - Where next
-
- Remember we want to draw this from our student

E.D.I.C.T.S

- Explanation
- Demonstration
- Imitation
- Correction
- Training
- Summary

S.E.A

a briefing model to help the instructor remember the important aspects of a brief

useful when teaching multiple craft such as single-handler dinghies, windsurfers and PW's

SAFETY

- Recall signals,
- What to do in emergency/capsize etc

ENVIRONMENT

- Area to be used
- Wind/tide
- Hazards in the area

ACTIVITY

- The task and aims
- How long/number of times
- Direction of travel

S.E.A

- Safety
- Environment
- Activity

P.A.M.E

a model for the student

encourages confidence and decision-making for boating manoeuvres

PLAN

- Consider what is affecting the boat
- Other water users,
- Hazards,
- Boat and equipment preparation
- Crew communications

APPROACH

- Having a Plan allows us to decide the safest easiest way to approach
- Considering the directions angle etc from the Plan

MANOEUVRE

- This is the actual boat handling
- Controlling speed
- Controlling the direction

ESCAPE

- What to do if it all going wrong
- Where is your escape? This can influence you Plan
- Early escape minimises: damage, injury and embarrassment

P.A.M.E

- Plan
- Approach
- Manoeuvre
- Escape
